Summary

Unity Game Developer with 1 year of professional experience building gameplay systems, VR experiences for Meta Quest 3, and multiplayer games using Photon PUN. Shipped a Meta Quest 3 VR title, optimized performance across platforms, and architected scalable, event-driven code. Experienced with version control, Agile/Scrum, and AI-assisted development tools including Claude Code.

Technical Skills

Unity Engine

1 Year of Professional Experience

Roblox Studio

6 Months of Professional Experience

Concepts

Design Patterns, Scriptable Objects, JSON Data Management, Localization, Firebase database,

Programming Languages

C#, Lua, JavaScript, HTML & CSS

Tools

Git, GitHub, Fork, Premiere Pro, Photoshop, Blender

Multiplayer Development

Using Photon Pun

Professional Experience

07/2025 – Present

Remotely

Junior Unity Game Developer, [Zinad](#)

- Developed a VR rhythm-action game for Meta Quest 3 — migrated from Oculus SDK 0.46.0 to Meta XR All-in-One SDK 72.0.0, rebuilt the player prefab using Building Blocks, and resolved Android build failures caused by a TMP3D shader incompatibility with GLES3 multiview stereo rendering
- Implemented dual-saber hit detection with a same-frame double-hit guard via Script Execution Order, and a DSP clock-based spawner syncing object pool releases to BPM
- Built a ScriptableObject-based state machine handling gameplay/quiz transitions with fully decoupled cross-system communication, and a quiz system with DOTween crossfade transitions and live Arabic/English locale switching
- Developed and optimized two game prototypes: a 3D endless runner with multiplayer support using Photon PUN, and a dynamic FPS shooter with reactive AI targets and timer-based scoring
- Architected core game mechanics using design patterns (State, Object Pooling) and ScriptableObjects for scalable, event-driven code
- Developed a dynamic inventory system integrated with Firebase for real-time data handling

05/2024 – 2025

Remotely

Game Development Instructor, [Da3em Academy](#)

- Instructed and mentored cohorts of students in game development principles for Unity and Roblox.
- Developed and delivered a comprehensive curriculum covering C# scripting, physics, UI/UX, animation, and project deployment.
- Guided students from initial concept to successfully launching their first games.

Projects

[Portfolio](#) 

My Game Development Portfolio, including All of my projects and Milestones

Volunteering/ Instructing

09/2023 – 09/2024

CIS Team MU, Team Leader

- Led one of the university's largest student organizations (700+ members), coordinating 10+ large-scale events and technical workshops.
- Managed workflow and deadlines across multiple teams, ensuring all events were executed on time.

09/2023 – 09/2024

CIS Team MU, Game Development Instructor

- Trained and mentored 50+ members in Unity and C# fundamentals, organizing multiple game jams that resulted in over 15+ completed game prototypes.
- Acted as a speaker and mentor at events (Beyond Earth, MagiCoders, VICTORIS 4.0) teaching game development concepts.

Education

09/2021 – 07/2025

Bachelor's Degree in Software Engineering,
Faculty of computer and information science, Mansoura University

Awards

01/30/2025

[ITI Cairo GameJam 2025 Advanced Level Winner](#) ,
ITI - Information Technology Institute (Cairo University)
